www.linkedin.com/in/muhammad-wahyu-adi-satria-1a925b247

Fresh graduate in Telecommunication Engineering from Universitas Telkom with a strong interest in Network Engineering, Software Development, and Information Technology. Hands-on experience building Python- and Flutter-based applications, including REST APIs with FastAPI, digital image processing with OpenCV, and SQLite database management. Practical understanding of network configuration using Cisco Packet Tracer and MikroTik, plus fundamentals of fiber-optic communication gained through a NOC internship. A collaborative team player with strong analytical and problem-solving skills, quick to adapt to new technologies, and eager to contribute professionally while growing within a forward-thinking organization.

EDUCATION

Telkom University	2022-2026
<i>Telecommunication Engineering</i>	GPA 3.14
- Relevant coursework: Computer Networks, Optical Communication, Wireless Communication, Programming. - Final Project: Developed a child nutrition status monitoring application using Python, FastAPI, OpenCV, Flutter, and SQLite.	
SMK Telkom Jakarta	2019-2022
<i>Computer Network Engineering</i>	
- Built a foundation in computer networking and network administration. - Developed network simulations using Cisco Packet Tracer. - Gained working knowledge of Routing, Switching, and VLAN configuration.	

INTERNSHIP EXPERIENCE

PT Starcom Solusindo	July 2025 – August 2025
<i>Network Operations Center (NOC) Intern</i>	
- Maintained and updated telecommunication equipment data across multiple network sites. - Created and managed maintenance and troubleshooting tickets through the company's ticketing system. - Recorded and verified network configurations (IP addressing, VLAN, DHCP) using MikroTik Winbox. - Monitored network traffic and equipment performance, providing input for network health evaluations. - Coordinated with technical teams to plan and execute telecommunication equipment maintenance.	

PROJECTS

MoNas – Monitoring Nutritional Status of Children (Android App)

Tech stack: Python, FastAPI, Flutter, OpenCV, SQLite

- Designed and built an end-to-end Android application that estimates toddlers' height and weight from smartphone photos and classifies nutritional status against WHO and Indonesian Ministry of Health anthropometric standards.
- Developed a RESTful backend with FastAPI and deployed it to the cloud (Railway) with GitHub-integrated CI/CD for automatic deployment on every code change.
- Implemented an HSV-based digital image processing pipeline in OpenCV (background segmentation, thresholding, body masking) and benchmarked it against a Canny edge-detection baseline, showing HSV delivered higher measurement accuracy.
- Built the Flutter front end with offline-first local storage in SQLite, including an examination history log with PDF export.
- Validated the system on 26 real toddler cases collected from Posyandu and TK Al Munar, achieving 96.58% accuracy (MSE 3.42 cm²) for height and 89.37% accuracy (MSE 10.63 kg²) for weight estimation — a combined average accuracy of ~93%.

ORGANIZATIONAL EXPERIENCE

HASTJA (SMK Telkom Jakarta Alumni Association)

2023 - 2024

Member

- Active member of the school's alumni association, supporting programs such as seminars, try-outs, and talkshows for current students.

TESLA (Telecommunication Event and Super League)

2023

Member

- Contributed as a committee member for the Telecommunication Engineering department's annual anniversary event, helping execute the full event series from preparation through the event day.

GATHRAK (Gathering and Arak-Arakan)

2024

Member

- Prepared and managed event equipment for the department's annual graduation send-off event, ensuring all logistics functioned properly throughout.

TECHNICAL SKILLS

- Programming & Backend: Python, Dart, Flutter, FastAPI, REST API design
- Data & Computer Vision: OpenCV, HSV Image Processing, SQLite
- Networking: MikroTik Winbox, Cisco Packet Tracer, IP Addressing, VLAN, DHCP, Network Monitoring
- Tools & Productivity: Git/GitHub, Microsoft Power Automate, Microsoft Office

SOFT SKILLS

- Critical Thinking
- Teamwork & Collaboration
- Communication
- Time Management
- Adaptability
